

COVID-19 Vaccine Information Brief

November 7, 2022

IMPORTANT/NEW COVID-19 Vaccine Information

- Moderna 10 COVID-19 Vaccine Shelf Life Extension
- COVID-19 Vaccine Resources
- Coadministration of COVID-19 Vaccine With Influenza and Other Vaccines
- V-Safe After Vaccination Health Checker

MODERNA 10 COVID-19 VACCINE EXPIRATION DATE EXTENSION

The U.S. Food and Drug Administration (FDA) has extended the expiration date for certain lots of the Moderna COVID-19 vaccine. Moderna has verified the new expiry dates below and updated the Moderna Vial Expiration Checker: <https://modernacovid19global.com/vial-lookup?#vialLookupTool>

Always be sure to check the manufacturer's website to obtain the most up-to-date expiration dates for COVID-19 vaccines. **It is important for healthcare providers to update vaccine expiration dates in IRIS.** Questions regarding IRIS vaccine inventory and adjusting expirations dates can be directed to the IRIS Helpdesk at 800-374-3958.

Count	Lot	OLD Expiry (9-month from DOM)	New Expiry (verified)
1	054A22A	2022-11-01	Feb 1, 2023
2	055A22A	2022-11-02	Feb 2, 2023
3	057A22A	2022-11-06	Feb 6, 2023
4	056A22A	2022-11-07	Feb 7, 2023
5	059A22A	2022-11-09	Feb 9, 2023
6	058A22-2A	2022-11-10	Feb 10, 2023
7	060A22A	2022-11-10	Feb 10, 2023
8	014B22A	2022-11-11	Feb 11, 2023
9	015B22A	2022-11-12	Feb 12, 2023
10	016B22A	2022-11-13	Feb 13, 2023
11	017B22A	2022-11-14	Feb 14, 2023
12	011B22A	2022-11-18	Feb 18, 2023

COVID-19 VACCINE RESOURCES

Below is a list of resources and upcoming informational activities related to the most current recommendations.

- [Interim Clinical Considerations](#)
 - [Vaccines.gov](#)
 - CDC [COVID-19 booster tool](#)
 - Web resources for immunization partners:
 - [Vaccinate with Confidence](#)
 - [Guidance for Vaccinating Older Adults and People with Disabilities: Ensuring Equitable COVID-19 Vaccine Access](#)
 - [Vaccinating Older Adults and People with Disabilities at Vaccination Clinics](#)
 - [Mini on-demand webinars](#) for healthcare providers
-

COADMINISTRATION OF COVID-19 VACCINES WITH INFLUENZA AND OTHER VACCINES

- Providers should offer influenza and COVID-19 vaccines at the same visit, if eligible.
 - This includes adjuvanted or high-dose influenza vaccines; administered in separate limbs.
 - With both influenza and SARS-CoV-2 circulating, getting both vaccines is important for prevention of severe disease, hospitalization, and death.
 - Getting both vaccines at the same visit increases the chance a person will be up to date with their vaccinations.
 - CDC and ACIP [guidance](#) recommends routine administration of all age-appropriate doses of vaccines simultaneously as best practice for people for whom no specific contraindications exist at the time of the healthcare visit.
-

V-SAFE AFTER VACCINATION HEALTH CHECKER

V-safe is a smartphone-based tool that uses text messaging and web surveys to provide personalized health check-ins after an individual receives a COVID-19 vaccination. V-safe web pages feature information on how to register and complete a v-safe health check-in (including step-by-instructions with images), troubleshooting, FAQs, and contact information for technical support.
